Project INFOVEK

www.infovek.sk

Project INFOVEK is a successful example of a public - private partnership between an NGO (API) and the Ministry of Education of Slovak Republic.

The aim of the project is to prepare the forthcoming generation for the labor market of the 21st century and improve their chances to succeed in the united Europe. Project INFOVEK is based on four pillars:

- connect all primary and secondary schools to Internet and equip them with multimedia class rooms,
- provide educational content,
- provide training of teachers in the field of ICT,
- spread digital enlightenment by opening the schools for local communities.

Project MESTO.SK

www.mesto.sk

Project is an integral part of the fourth pillar of Project Infovek. It is managed by a Slovak NGO, Civic Association e-Slovensko, and its aim is to provide an Integrated Portal Architecture (IPA) for local and global governance. Mesto.sk integrates information about 183 Slovak cities and provides local self-government information and services for citizens.

NOD32 - virus protection system

www.eset.com

NOD32 is a state of the art virus protection system developed in Slovakia by ESET Software. The NOD32 virus protection system is currently rated the best in the world by most independent rating agencies for protecting the digital worlds of Infovek, Mesto.sk, Dell Computers, Microsoft Laboratories and many others.
