### **Integration of Unified Informatization System of Self-governments and Latvian Educational Informatization System**

*<http://www.lps.lv>*

Both projects are targeted at e-society on local and regional level and their main goals are:

- Informational support to self-government functions operating in integrated state significance information system.
- To build information society by using the latest information technologies and improving the quality of Latvian education system.

### **Providing government budget planning and state treasury management needs in Latvia with mySAP software**

*<http://www.fm.gov.lv>*

To reinforce an institutional and administrative capacity in Latvia, Ministry of Finance and State Treasury have together developed an information technology strategy, the key recommendation was using standard off-the-shelf software. In open international tender participated the greatest ERP software vendors, the best offer were from local SAP partner Fortech.

Presentation get view of the implementation of mySAP Public Sector functionality - Funds Management Government - which ensures the budgeting and budget execution functions. In near future Ministry of Finance of Latvia will implement mySAP Business Warehouse, Knowledge Management, Strategic Enterprise Management and Enterprise Portals components.
