★ **Register of Public Servants and Public Servants Management System**
VATARAS, www.vataras.lt, registras@vataras.lt

Project Purpose:
Increase administrative capacity of ministries and governmental institutions via implementation of the Public Servants Management System.

Object:
VATARAS contains data on:

- structures, vacant and occupied positions of state and municipal institutions and agencies,

- public servants and their remuneration.

Register of Public Servants receives data from state and municipal institutions (approx 500). Software is based on Internet/Intranet technology, Web Browser (Microsoft Internet Explorer), Microsoft Back Office.

Data protection:
Identification of VATARAS users is performed using digital certificates. Before the national centre of electronic signature certification is established and starts functioning, management office of VATARAS will act as a temporary Certification Authority.

VATARAS provides data on:
Statistics, analysis, reports, calculation of service length, calculation of vacation length, restoration to public service (to public servant's status), management of written exams for the recruitment (data base of tests).

Future plans:
Planning needs of staff and their remuneration fund, recruitment and selection of high-skilled public servants, management of public servants' career development, registration of training institutions and training programs.
